

server was run on 3 cores using taskset
>>taskset -c 0-2 ./server 8000

Load Generator program was run on 4 cores using taskset

>>taskset -c 4-7 ./a.out localhost 8000 x 1 15

x is the no.of concurrent users of closed loop generator which varies from 1000 to 9000 each ran for 15 secs

Both of the graphs were generated based on the above configurations.
